Innovative Features

CliniQuant is a compact, high performance, biochemistry analyzer for routine chemistries and turbidimetric immuno assay.

CliniQuant is provided with large LCD display with LED back light that allows excellent visuals, thus eliminating manual errors during data entry.

The QWERTY keyboard ensures ease of operation during assays.

CliniQuant interfacing software via RS232 port assists to maintain result history and also to monitor overall efficiency of reports.

CliniQuant 32 μ l Quartz flow cell not only reduces the sipping volume but also the running cost. The quartz flow cell allows maximum transmission of light thus increasing the efficiency of the optical system.

CliniQuant™ has in-built incubator slots that provide accurate temperature for reagents and reaction mixtures thus ensuring optimal reaction with sample.

CliniQuant resolution of 0.0001 helps to detect even the slightest changes in Optical Densities for all type of assays. Such high sensitivity of the analyzer ensures that even specialised tests are performed with excellent accuracy and precision.

CliniQuant 3 levels of QC with Levy Jennings plot continues to remind the necessity of maintaining proper quality checks to minimise any erroneous results.
